Charged Up and Ready To Go

A long-time leader in advanced fuel dispensing equipment, Dover Fueling Solutions® brings quality, innovation, and reliability to EV charging with the Wayne PWR™ DC fast chargers.

Choose one of five power configurations to best meet your specific installation needs.

Options include:
640kW, 400kW, 240kW, 200kW & 160kW

Key Benefits

- Engineered for all-weather durability with a rugged design featuring robust styling, emphasizing strength, capability and a familiar functional aesthetic.
- Generate new revenue streams and unlock driver insights. Leverage EV charging data to glean insights and provide personalized experiences. Monitor the status of your chargers in real time with our cloud-based charge station management system.
- Unrivaled manufacturing quality with the 130+ year Wayne legacy of excellence and innovation, and designed and manufactured in the USA, Wayne PWR™ features a sleek, compact, NEVI-compliant design that is highly reliable and easy to maintain.
- Comprehensive service, remote diagnostics, proactive monitoring, and heartbeat checks with a nationwide service network.
- Engaging interface which features an intuitive 12-inch digital touchscreen, Wayne PWR™ displays power level, remaining time-to-full-charge and energy consumption.
- Easy, secure payments with forecourt control. EMV compliant transactions are managed through a fully integrated POS with remote communications to the cloud. Retail customers receive digital receipts.
- Thoughtfully designed allowing for custom branding on the charger exterior and digital screen, Wayne PWR™ features a sleek, compact aesthetic plus green and red charging post lights indicating charger status from a distance.
