DFS Worldwide Brands

Join the Evolution

Harnessing the power of data and information technology has forever changed the way we run our fuel operations. Through embracing this evolution, we have become more streamlined and efficient with a greater focus on the customer experience. The Wayne Helix fuel dispenser range is synonymous with technology and innovation and can drive your business into the future.

Using state-of-the-art, field-proven, technologically-advanced components, Wayne Helix® fuel dispensers represent the very best that Dover Fueling Solutions® has to offer. Delivering outstanding performance, unparalleled reliability and high precision, these dispensers have been engineered to revolutionize not only your forecourt, but the fueling industry.

DFS *Worldwide* Brands

1 The fuel dispenser: redesigned & reconceived

Designed and engineered on a single global platform, Wayne Helix® fuel dispensers emphasize intelligent design, advanced technology, safety and security.

2 Intelligent design

Feedback from distributors, retailers, motorists and technicians across the globe helped to influence the function, ownership and serviceability of this intelligently-designed dispenser.

3 Safety & security

Helix® fuel dispensers meet IEC and UL safety standards while addressing a wide variety of safety concerns. From payment transactions to secure internal dispenser components, the design of the Helix® fuel dispenser helps deter and detect product tampering and fuel theft.

4 Advanced technology & high quality

Helix® fuel dispensers incorporate global components, innovative metering and durable materials. The AX7™ technology leverages Anthem UX® software, allowing for enhanced serviceability, and future updates. Using the best of Dover Fueling Solutions®' advanced technology creates a superior fueling experience now and for the future.

The choice is yours.

The Wayne Helix[®] fuel dispensers with AX7[™] technology are highly configurable, addressing the specific needs of users no matter their fueling demands. Choose from two, expertly engineered dispensers and transform your forecourt.

Wayne Helix[®] 4000 fuel dispenser with AX7[™] technology

Big Player, Small Profile

The Helix[®] 4000 fuel dispenser with AX7[™] technology is built with up to four nozzles and has the ability to dispense five fuel grades, with the hose retraction option providing ample reach for easy refueling. This model is ideal for sites requiring a smaller dispenser footprint, without limiting the customer's refueling options. As with the Helix[®] 5000, the Helix[®] 4000 fuel dispenser is perfect for remote dispensing applications and for forecourts requiring suction pumps within the dispenser unit.

Wayne Helix[®] 5000 fuel dispenser with AX7[™] technology

Core of Flexibility

The redesigned Helix[®] 5000 fuel dispenser with AX7[™] technology is a versatile, durable workhorse for your forecourt and is now available with the flexible, multi-hose blender configuration direct from the factory, with up to six buttons per side. The Helix[®] 5000 fuel dispenser is well adapted for use in remote dispensing applications, as well as for sites that require suction pumps within the dispenser itself. No matter the application, this flexible and dependable model is a great option to fit a variety of forecourt fueling needs.

Industry-leading features that reflect the very best of Wayne®

INTELLIGENT DESIGN

Separation of “clean” and “dirty” areas — Helps keep hoses, dirt and fuel away from the user interface, drawing users’ attention to the branded areas and payment terminal

Slim, attention-getting profile — Openness from the side and a streamlined, refined profile are appealing to customers and give station attendants a better view of the forecourt

Large-panel hydraulic cabinet doors and valances — Provides uninterrupted branding space to boost merchandising real estate

Weld-free exterior and framework — Reduces catalyst points for corrosion, helping to lower maintenance costs and maintaining the appearance of the dispenser

Compact footprint — Installs over existing Wayne footprints and most sumps, helping to simplify installation and reduce retrofit costs

SAFETY & SECURITY

EMV® compliance and upgradeability — Provides full compliance with global EMV payment security standards as well as easily upgradable EMV-ready options

Enhanced visibility — Promotes assurance of personal security through improved visibility over, around and through the pump

Wayne iX Pay® 2 Payment Platform — Built on a single, global technology platform, enabling configuration flexibility that easily meets specific regional requirements. PCI6 Certified for future-proof compliance.

USER INTERFACE

Intuitive user interface (UI) and large, bright display — Features a high-contrast and durable 7” color touch display, as well as angled unit price displays above the push-to-start buttons with white-on-black digits for clarity in outdoor environments, all designed to provide easier reading, day and night.
